RIZZUME

ATS Breakdown ⚡

Why your resume gets quietly rejected by the ATS.

3 common formatting traps every student should avoid.

01 **Multi-Column Layouts**

02 **Missing Exact Keywords**

03 **Zero Numbers**

Swipe to read →

FORMATTING TRAP

Multi-Column Layouts

Many ATS tools read columns out of order.

THE CLEAN FIX

Use single-column hierarchy.

A vertical layout ensures every section and date parses in the correct order.

KEYWORD TRAP

Missing Exact Keywords

Algorithms filter out resumes without specific keyword matches.

THE CLEAN FIX

Match the exact tools and words written in the job post.

Python Git REST APIs Docker

METRICS TRAP

Zero Numbers

Digits and metrics show measurable proof of your work.

(EXAMPLE)

"Processed 1,200 records in 2 seconds"

Quantify scale, speed, or test coverage in your project bullets.

Digits anchor attention immediately.

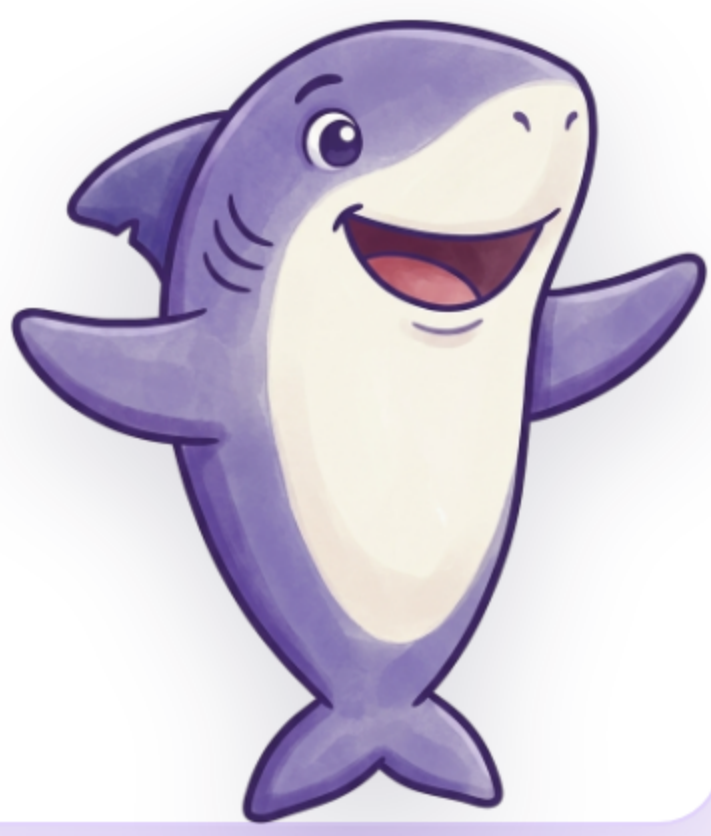

INSTANT ACTION

Want to check your ATS readiness?

Comment CV

and I will DM you the free resume score scanner.

- Instant score out of 100 in 2 minutes
- Missing keyword gap analysis
- Single-column layout verification
